RISING TO TODAY'S CHALLENGES

SAP customers focused on continuous improvement and innovation are looking to the SAP Business Technology Platform (BTP) to help them move faster. SAP BTP offers services and solutions in the areas of: application development and automation, data and analytics, integration, and AI capabilities.

To help our clients create an approach to adopt, migrate, and utilize the best SAP BTP services and innovations, we've created a detailed **SAP BTP Exploration and Advisory** service.

Starting Your SAP BTP Exploration Journey

SAP BTP Exploration and Advisory service

Mindset's BTP Exploration and Advisory service helps organizations design, implement, and optimize their use of the SAP Business Technology Platform (BTP). Mindset works closely with customers to understand their business needs and goals, and then provides expert guidance on the best ways to use SAP BTP to support those needs. The goal of SAP BTP Advisory is to help customers maximize the value of their investment in BTP and achieve their desired business outcomes by setting up the foundation for success. Content and deliverables can include things such as:

- Platform adoption
- Architecture guidance including things such as subaccount strategy, SSO, Cloud Connectors, destinations, hyper-scaler recommendations, and other specific BTP service advisory as needed
- BTP-focused development approach (Clean Core)
- Deployment strategies
- Security topics such as IAS, Principal Propagation
- Assistance with aligning customer principles/guidelines
- Recommended approaches to comply with "Best Practices for SAP BTP" published by the SAP BTP CoE
- SAP BTP Innovation services overview & demos (SAP Build toolsets)
- SAP BTP Workzone toolset overviews
- Ways to accelerate end user experience transformations with SAP BTP hosted applications
- Analytics in BTP - SAP Analytics Cloud/Datasphere
- And other topics as needed based on client focus areas.

KEY BENEFITS

By using our service, you can gain insights into SAP BTP and how it could work specifically in your SAP environment, including a prioritized roadmap on adopting services, guidance on BTP architecture best practices, governance best practices, ideas of areas to automate, along with demos and use cases we commonly see and deliver!

Time to deliver:
Usually 40-80 hours over 4 weeks based on client topics and priorities
