

# M-Suite Rapid Deploy

The fastest way to deploy SAP Integration Suite across your landscape

## PRODUCT OVERVIEW

M-Suite Rapid Deploy is a Mindset Infrastructure-as-Code accelerator that automates the deployment of SAP Integration Suite across Development, QA, and Production environments on SAP BTP.

It reduces environment setup time by up to 90% while enforcing SAP best practices, governance, and consistency from day one.

### The Challenge

Traditional Integration Suite deployments are manual, time-consuming, and error-prone—requiring repetitive configuration, entitlement assignments, role setup, and documentation. Typical effort ranges from 60–75 hours across three environments.

### The M-Suite Rapid Deploy Solution

M-Suite Rapid Deploy automates the full Integration Suite foundation using Infrastructure as Code. A single command provisions Dev, QA, and Production environments with standardized naming, version-controlled configuration, and built-in best practices—in hours instead of weeks.

## Key Features

- **One-Command Deployment:**  
Provisions Dev, QA, and Prod environments in minutes
- **Standardized BTP Structure:**  
Organized directory and subaccount layout
- **Consistent Naming:**  
Customer-based, professional naming conventions
- **Infrastructure as Code:**  
Version-controlled, repeatable, auditable deployments
- **Best Practices Built-In:**  
Security, governance, and SAP standards included

## Business Value

**Speed:** Environments ready in minutes, not days.

**Consistency:** Identical Dev/QA/Prod landscapes.

**Governance:** Infrastructure as Code with full auditability.

**Lower Risk:** Automated, tested deployment process.

## Real-World Impact

- ✓ **90%+ reduction in deployment time**
- ✓ **95% reduction in manual configuration errors**
- ✓ **100% consistency across environments**
